

JOURNALISTS

The aim: To find the truth.

The resources (e.g. finances, human resources, political influence, reputation, etc.): Good reputation. Not enough finances, not enough time for highly skilled journalists, big political influence.

The roles: They need to dig out the truth, understand the arguments and find out "skeletons" and contradictions, lies.

Attitudes towards the following aspects: Food quality and safety – support; Innovation, R&D (alternative pesticides) – support; Environmental goals (bee preservation) – support; Food security (availability of reasonably priced food) – support; Economy (industry profit and state budget, job market) – support.

Skeletons (could be about the whole group, or about an individual in the group): Some of them got grants from the Lugovia Environmental Protection Foundation, and pesticide producers and big farmers might blame them for not being objective.
